

We Helped The Jeep® Platform
Create Roadmaps To System Solutions

With Our Advanced Silicon.

When the Jeep® Platform wanted systems to conquer a harsh automotive environment, they put STMicroelectronics in the driver's seat.

That's because ST's smart power technology provides rugged, all-terrain performance. Plus, a track record for leading-edge manufacturing capability and guaranteed delivery made ST the ideal partner of choice.

One thing's for sure: when you need solutions for tough environments, it's smart to rely on ST's road-tested parts.

For more information on STMicroelectronics, and all of our products that are setting higher standards, go to www.st.com.
